

Instructions for the SSP375 Tensioner using the SSB32 32mm Wire Buckle

1
Cut Strap
leaving a
18"- 20"
overlap

2
Fold one
side of
strap back
12" making
a loop

3
Thread the
loop through
the middle
of the wire
buckle

4
Place loop
around one
end of wire
buckle and
pull.

5
Thread
opposite end
of wire buckle
and pull tight

6
Squeeze ratchet
handle, opening
the brake
release

7
Place strap
under the cutter
and onto the
brake platform
and release

8
Thread the
end into the
cutter and
the split shaft

9
Tension strap by
pulling back on
ratchet handle

10
After tensioning,
squeeze handle
to cut strap and
release the
brake
